

# HOPE FOR HENRY TOP FIVE REPORT

September 2023

## Top Five? More Like Top One!

This month we are focused on back-to-school preparation and making necessary vaccinations as stress-free as possible.

Hope for Henry is THE vaccination destination this National Immunization Awareness Month! Just in time for back-to-school preparation, we've launched our brand-new website, [vax.hopeforhenry.org](http://vax.hopeforhenry.org), that brings our Super Rewards for Vaccinations program from the clinic to your pocket. Thousands of children in pharmacies and clinics across the country have used our resources to make the immunization process smooth and phobia-free, and we hope the accessibility of this new website and our new [Landing Page](#) will bring them to thousands more.

Visit the vaccine website and familiarize yourself with the product! Share it with the parents of little ones in your life! Share it with friends in high places! Share it with anyone you think maybe benefit or may benefit us.

**Helping Your Child Get Vaccinated**

To help prepare your family, Hope for Henry has developed age-appropriate information and tools to improve your and your child's overall vaccination experience.
